INSTRUCTIONS TO DEVELOPERS/ DESIGNERS WORKING ON SITES HOSTED BY OUT OF NOWHERE

OON hosts The Client's site on its servers which are optimized for security and the quick delivery of website content. Because multiple sites are hosted on a single server, the security of one site easily the security of other sites hosted there and the security of the server itself. Additionally, OON strives to maintain its positive reputation. For that reason, we enforce some restrictions on the type of content that can be hosted on our servers.

Designer/Developer Software Guidelines

Any individual who adds software (themes, plugins, et.al.) must follow the guidelines below to ensure the integrity of the website and the server. The designer/developer will:

- Avoid any theme or plugin which has a low version number or indication it was developed within the last twelve (12) months.
- Avoid any theme or plugin which has not been updated within the last four (4) months.
- Run all installed plugins through a WordPress vulnerability database such as wpscan.com. If a plugin is listed in the vulnerability database, the database must indicate all vulnerabilities have been patched.
- Ensure all installed themes or plugins work with the most recent stable version of PHP.
- Not deactivate or delete any plugins installed by OON to ensure the security of the site, allow for efficient software monitoring, and perform scheduled backups. Examples of such plugins are WordFence, UpdraftPlus, Really Simple SSL, Really Simple SSL Pro, and ManageWP.

Restrictions

The Client will not use the WHS for any unlawful or harmful purpose, any purpose that would put OON in a bad light. The client will not use OON's WHS to:

- Host any application other than one (1) instance of WordPress.
- Promote multi-level marketing, dating, pornography, or hate.
- Host, store, send, relay, or process any harmful components including viruses, malware, and trojan horses.
- Infringe any person's/organization's intellectual property, privacy, or other proprietary rights; to slander, libel, or defame any person/organization; publish a person's/organization's personal information or likeness without consent; or otherwise violate a person's/organization's privacy.
- Harass or threaten, or make offensive, indecent, or abusive statements or messages.
- Participate in internet relay chat.
- Abuse the WHS, disrupt other users' access to the WHS, or otherwise harm or impede the WHS.
- Reverse engineer any of OON's systems.
- Attempt to gain unauthorized access to use the WHS.
- Attempt to help others gain unauthorized access to use the WHS.
- Put OON in breach of other obligations.

OON reserves the right to be the sole judge of what sites it will host and may refuse to host a site for any reason.
